### DETAILED ACTION

1. Examiner regrets the untimely reopening of prosecution.
2. Applicant's amendment and accompanying remarks filed July 8, 2008 are acknowledged.
3. Examiner acknowledges amended claims 1 and 21-22.
4. Examiner acknowledges cancelled claim 20.
5. The rejection of claims 1 and 21-22 under 35 U.S.C. 102(e) as being anticipated by Hosokawa et al., U.S. Patent Number 6,534,199 is withdrawn due to applicant's argument.

### *Claim Rejections - 35 USC § 103*

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1 and 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Xie et al., U.S. Patent Number 5,989,737.

Xie discloses a organic electroluminescent device comprising a pair of electrodes with a hole transporting layer (acts as a light emitting layer) disposed therebetween. Additionally, Xie discloses that the hole transporting layer comprises a combination of an arylamine with a

structure such as

with P<sub>n</sub> being an arylene group (generic species) and a

polycyclic condensed material such as

(see columns 5 and

column 10). Xie does not disclose that  $P_n$  is a residue group derived naphthalene, phenanthrene, fluoranthene, anthracene, pyrene, perylene, coronene, chrysene, picene diphenylanthracene, fluorene, triphenylene, rubicene, benzoanthracene, phenylanthracene, bisanthracene, dianthracenylbenzene or dibenzoanthracene, each being substituted or unsubstituted. The residue groups recited in the present claims are species of the generic arylene. Therefore, it would have been obvious to one of ordinary skill in the art that the Xie reference can include the residue groups of the present claims since they are encompassed by the generic arylene.

### ***Response to Arguments***

8. Applicant's arguments with respect to the present claims have been considered but are moot in view of the new ground(s) of rejection.
